

Statement

Rapid SARS-CoV-2 Antigen Test Card manufactured by Xiamen Boson Biotech Co., Ltd. detects the nucleocapsid protein (N protein). It does not target the spike protein (S protein) of genetic SARS-CoV-2 variants (e.g., the UK N501Y Mutation, the N501Y.V2, E484K, and K417N Mutation in South Africa). Therefore, theoretically, mutations in the spike protein do not affect the product performance, and our test can detect the mutant SARS-CoV-2 strains.

We will be actively monitoring information regarding mutant SARS-CoV-2 strains, and will follow up with evaluation of our test kits in the near future.
